

POCKETSMART AI: USER EMPATHY MAP

1. Target User Persona: The Modern Budget Planner

- **Demographics:** Middle-class individuals, young professionals, event hosts, and modern homeowners (Ages 18–45).
- **Primary Objective:** Execute lifestyle, domestic, and festive projects comfortably within strict financial boundaries.

2. The Four Quadrants of User Experience

SAYS		THINKS	
• "I have ₹50,000 for home decor, before the		• "Will I run out of cash	
how should I split it?"		project is finished?"	
• "Where can I find reputable stores caterer		• "Is the decorator or	
matching my budget?"		overcharging me?"	
• "I need 15 guests accommodated just curate		• "I wish someone would	
without exceeding ₹20,000." budget."		a verified list for my

and retail portals simultaneously.		
• Writes rough estimates on notes costs and	• Anxious about surprise last-minute budget blowouts.	
or disorganized spreadsheets.		
• Cuts down on essentials when when an AI	• Relieved and confident	
primary allocations overshoot.	provides clear categorical splits.	

3. User Pains & Gains Analysis

Pains (Frustrations & Obstacles)

- **Cognitive Fatigue:** Spending hours calculating unit costs, per-guest food expenses, and room lighting counts.
- **Unrealistic Estimation:** Assuming low budgets will cover premium items, resulting in midway abandonment.
- **Manual Shopping Effort:** Identifying an item in a plan but having to search for it separately across various e-commerce sites.

Gains (Desired Value & Relief)

- **Instant Clarity:** Receiving a complete, percentage-balanced financial breakdown within one second.

- **Direct Purchasing Ease:** One-click redirection to Amazon, Flipkart, IKEA, Swiggy, Zomato, and Tanishq.
- **Stress-Free Decision Making:** Eliminating financial uncertainty with actionable, itemized recommendations.
