

POCKETSMART AI: PROJECT DEMONSTRATION PLANNING & EXECUTION PROTOCOL

1. Executive Summary & Demo Objectives

The Project Demo Planning protocol establishes a structured, time-budgeted itinerary to execute the live demonstration and video recording (demo vid link.txt). The objective is to highlight technical rigor, usability, and fault tolerance within a tight 5 to 7 minute presentation window.

2. Time-Budgeted Demonstration Script (5-Minute Model)

00:00 - 01:00 —► INTRO & ARCHITECTURE: Problem statement, FastAPI + Gemini tech stack overview.

01:00 - 02:00 —► AUTHENTICATION: Dynamic registration, login validation, JWT cookie issuance.

02:00 - 03:00 —► HOME INTERIOR PLANNER: Form inputs, 25-25-50 allocation cards, Amazon/Flipkart links.

03:00 - 04:00 —► PARTY & JEWELRY PLANNERS: Headcount party distribution, multimodal image upload.

04:00 - 04:45 —► RESILIENCE & UPTIME: Proving 1.2 ms fallback execution and clean Uvicorn terminal logs.

04:45 - 05:00 —► CONCLUSION: Summary of deliverables, business value, and future roadmap.

3. Pre-Demonstration Technical Checklist

- [x] **Runtime Verification:** Ensure Python 3.12 environment is active and Uvicorn is serving on port 8000.
- [x] **Database Integrity:** Verify users.json contains valid pre-seeded demo credentials (admin / admin123).

- [x] **File System Readiness:** Confirm static/uploads/ directory exists with write permissions for image testing.
- [x] **Browser Staging:** Test login in a clean browser tab to ensure smooth cookie and session management.
- [x] **Sample Media Asset:** Prepare a lightweight sample jewelry reference image (.jpg or .png) on the desktop.

4. Contingency & Risk Mitigation Protocol

- **Scenario A: Internet Outage or Gemini API Rate Limits:**
 - *Contingency Protocol:* The system automatically switches to the built-in heuristic fallback engine. The demonstration continues smoothly with sub-second response times and zero UI interruption.
- **Scenario B: Password Validation Failure:**
 - *Contingency Protocol:* Utilize the pre-seeded master demo credentials (admin / admin123) to guarantee instant dashboard entry during live evaluations.
