

POCKETSMART AI: CUSTOMER JOURNEY MAP

1. Executive Summary

The Customer Journey Map illustrates the end-to-end lifecycle of a user interacting with PocketSmart AI. It maps emotional states, touchpoints, obstacles, and system responses from initial discovery to successful budget execution and e-commerce acquisition.

2. Comprehensive Journey Map Grid

Journey Phase	User Action	Thoughts & Mindset	System Touchpoint	Friction / Pain Point	System Resolution & Delight
1. Discovery & Awareness	User navigates to the PocketSmart AI home landing page.	"I have an upcoming event / home renovation and a strict budget."	Landing Page (/), Hero Banner, Feature Highlights.	Fear of complicated forms or paywalls.	Clean, welcoming UI explaining multi-category planning with zero upfront cost.
2. Secure Onboarding	Registers or logs in using user credentials.	"I hope my budget plans are securely saved"	/register & /login forms, JWT Auth Handler, users.json.	Annoying password requirements or slow	Instant JWT token creation, smooth session cookie

		for later."		login forms.	handling, and fast dashboard access.
3. Planner Exploration	Selects target planner module from the central dashboard.	"Let's see if this tool handles specific rooms or event headcounts."	Dashboard (/dashboard), Card Grid (Home, Party, Jewelry).	Unsure which parameters to input first.	Visual card navigation with distinct iconography and clear descriptions.
4. Constraint Specification	Enters total budget amount and custom constraints (e.g., lights, guests, occasion).	"Can ₹50,000 realistically cover 4 lights, 2 fans, and furniture?"	Form Inputs, Checkboxes, Image Upload file pickers.	Fear of unrealistic calculations or broken submissions.	Pre-validate inputs, responsive form fields, and instant client-side feedback.
5. AI Processing & Allocation	Clicks Generate Recommendations.	"Will it crash or take minutes to	FastAPI Endpoint (routes/planners.py), Gemini AI Engine &	API downtime, timeouts, or 500	Sub-second response delivery via

		compute?"	Fallback Layer.	server crashes.	Gemini or deterministic fallback engine.
6. Plan Review & Purchase	Examines percentage split-ups, estimated unit prices, and clicks store buttons.	"These allocations are balanced, and I can buy directly!"	Dynamic Result Cards, Direct Links (Amazon, Flipkart, Swiggy, Tanishq).	Having to manually search product names in other apps.	One-click redirection to pre-filled search queries on leading Indian retail sites.
