

POCKETSMART AI: DATA FLOW DIAGRAM (DFD) SPECIFICATION

1. DFD Level 0 (Context-Level Diagram)

The Level 0 DFD illustrates the boundaries of the PocketSmart AI system, identifying external entities, system boundaries, and primary information exchanges.

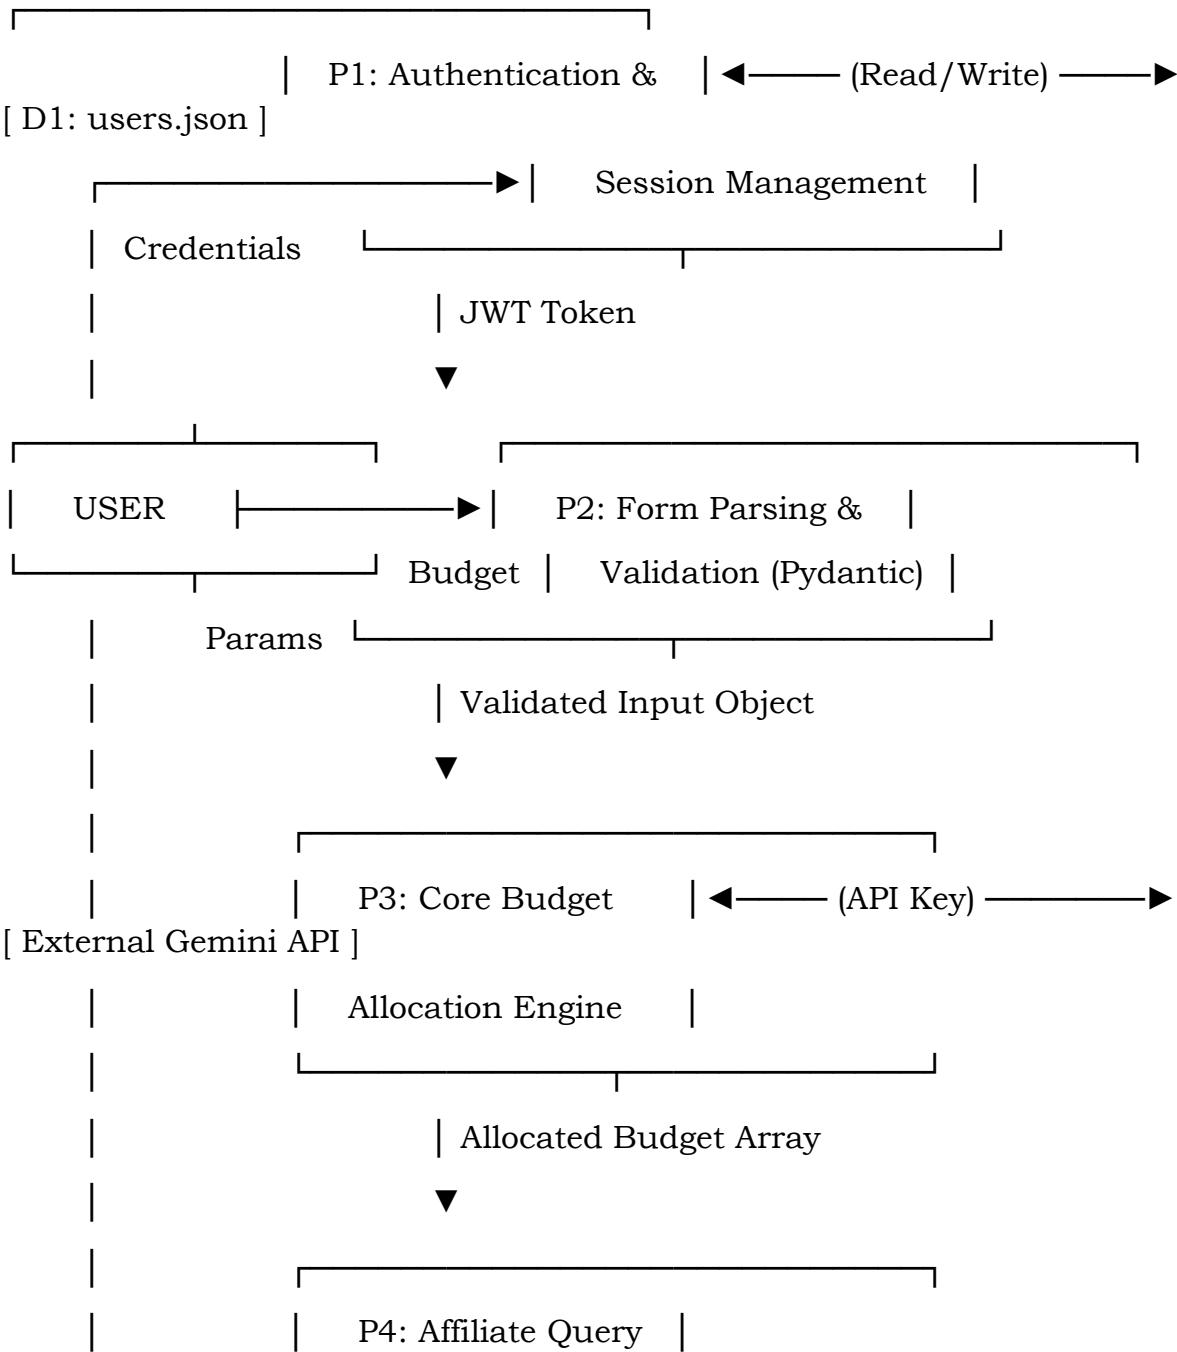

User Credentials & Budget Constraints

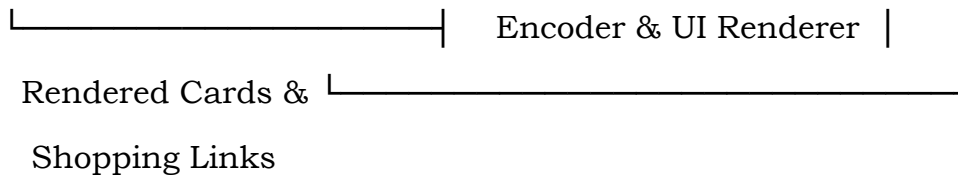

2. DFD Level 1 (High-Level Process Decomposition)

Level 1 decomposes the main system into four fundamental internal processing nodes:

3. Data Store Descriptions

- **D1: users.json:** Flat-file JSON document storing username keys, email addresses, full names, and Bcrypt cryptographic password hashes.
- **D2: /static/uploads/:** Ephemeral file storage managing uploaded user visual references for jewelry vision analysis with timestamp prefixes.
